Game features

6 to 14 chip icons trigger the Special Lightning Feature. The chip symbols that trigger the Special Lightning Feature are held in position and all other positions turn into individual spinning reels. 3 Respins are awarded. If one or more additional chip icons appears in any position, these are also held, and the number of Respins remaining is reset to 3. The Special Lightning Feature finishes when either no Respins remain or if the GRAND JACKPOT is won. Pay table prizes are not awarded during the Special Feature. The Grand Jackpot is awarded when all 15 positions on the screen are occupied with chip icons.

3 or more Scatter Symbols wins you 6 Free Spins! During the Free Spins, the 2nd, 3rd and 4th reels play as a single reel. Symbols on the 2nd, 3rd and 4th reels play stacked and always appear full-sized. The Special Feature can be won during the Free Spins.
